

Shivam Jaywant Jagtap

DevOps Engineer

☎ 8669310012 | ✉ shivamjagtap2761@gmail.com | [LinkedIn](#)

Professional Summary

A highly motivated DevOps Engineer with 10 months of hands-on experience in automating software development processes, managing cloud infrastructure, and implementing CI/CD pipelines. Proficient in tools such as Docker, Kubernetes, Terraform, Jenkins, and AWS. Successfully contributed to streamlining workflows, enhancing deployment efficiency by 30%, and ensuring system reliability. Knowledge in various programming languages including Python, C, and SQL. Proven ability to deliver robust and scalable solutions. Committed to continuous learning and professional development.

Experience

HisanLabs Pvt Ltd

DevOps Engineer Intern

November 2024 – September 2025

- Experience in working with AWS Services like **EC2, VPC, IAM, S3, ELB, Auto Scaling, RDS, CloudWatch, SNS, CloudTrail, Route53, CloudFront**.
- Configured and maintained **automated CI/CD pipelines** in Jenkins for **3+ microservices**, reducing deployment errors by **30%**.
- Provisioned and managed **EC2 instances, S3 buckets, and IAM roles** in AWS to support **multi-tier application environments**, improving infrastructure scalability by **40%**.
- Developed and deployed **10+ reusable Terraform modules** to automate infrastructure provisioning on AWS, cutting manual setup time by **60%**.
- Conducted resource allocation and utilization analysis, leading to the optimization of container resource limits and requests. This resulted in a 15% reduction in infrastructure costs while maintaining optimal application performance.
- Streamlined the CI/CD pipeline for Java-based applications using **Maven**, resulting in a 20% reduction in build and deployment times.
- Containerized applications using **Docker**, creating custom Dockerfiles and managing multi-container setups with Docker Compose, ensuring consistent development environments across **5+ projects**.
- Integrated **Amazon CloudWatch** for system and application monitoring, setting up **custom metrics and alarms** that reduced incident response time by **25%**.
- Deployed and managed containerized workloads using **Kubernetes (EKS)**, enabling **zero-downtime rollouts** and autoscaling for production workloads.
- Implemented **SonarQube** for static code analysis within Jenkins pipelines, improving code quality and reducing critical vulnerabilities by **40%**.
- Managed version control using **Git and GitHub**, following GitFlow practices and contributing to **20+ pull requests** with code reviews and CI checks.
- Enabled **VPC Flow Logs** for network traffic analysis, enhancing security measures by identifying and mitigating 20+ potential security threats and improving incident response time by 35%.

Education

Sinhgad College of Science

M.Sc. (Computer Science)

2022-2024

CGPA: 7.40 / Percentage: 63.95%

Sinhgad College of Science

B.Sc. (Computer Science)

2019-2022

CGPA: 8.73 / Percentage: 83.73%

CloudBlitz Technology

Linux, AWS, DevOps

Completed – October

Skills

- IaaS : Terraform
- Deployment: EKS, Kubernetes
- Testing: Sonarqube, Trivy
- CI/CD: Jenkins, Argo
- Version Control System: Git, Github, Gitlab
- Database: MYSQL, RDS, MongoDB, DynamoDB
- Others: Linux, Shell scripting, Maven
- Cloud Platform: AWS (EC2, S3, ECR, VPC, EKS, RDS, IAM), Azure, GCP
- Containerization: Docker
- Configuration management: Ansible
- Monitoring: Cloudwatch, Prometheus, Grafana, Datadog
